

TORSION-TRIP V-PLOW

9200 SERIES

NEW
FOR 2015 SEASON!

Solid Hiniker Performance in a Torsion Trip-Edge Plow

- Double-acting hydraulic cylinders hold wings securely in position, even while backdragging.
- Simple, reliable torsion-trip edge provides independent protection to each plow wing.
- Corrosion-proof and dent-resistant HDPE plow surface reduces friction for better snow flow.
- Top-quality design, construction, and components in a contractor-duty plow.
- Wrap-around curb guards with chrome-alloy wear-bars provide protection from premature wear and damage.
- Available in 8.5 and 9.5 ft. widths.
- Customizable with optional skid shoes, cutting edges, and snow deflectors.

Model	Width—Overall	Width—Scoop	Width—Vee	Width—Full Angle	Center Height	Outer Height	Weight*
